Labels for Production and Quality Control use

Which type of label is right for me?

Sampling Systems offer two types of standard label backing:

- Ultra Adhesive Labels
- PharmaLabels

1. Ultra Adhesive (UA) Labels UA

UA Labels are special high quality labels with an ultra-adhesive foil backing. They are ideal for use on sacks, drums, kegs, boxes, bags etc.

- Standard labels are available in two sizes: 95mm x 95mm or 150mm x 150mm
- Very high strength adhesive - will even stick on very dusty surfaces
- Working Temperature Range -20 to +70°C (-5 to +160°F)
- Ideal for repairing holes in sacks

Dust Proof

UA Labels are ideal for sealing sacks after sampling. UA Labels will stick to virtually any surface, they will even stick to dusty sacks.

The label will not only record the fact that the sack has been sampled but it will prevent the sack from leaking powder as it is handled.

Weather Proof

Even after being submerged in water for 48 hours the UA label was intact, it was securely attached to the bag and could be written on using a ball point pen.

2. PharmaLabels PL

PharmaLabels are a range of paper labels with a special adhesive that conforms to FDA and EC specifications. PharmaLabels are ideal for applications where the adhesive might come into contact with the product.

- Medium strength adhesion
- FDA acceptable adhesive conforms to FDA CFR175.105
- Food grade adhesive conforms to EC 1935/2004
- Working Temperature Range -40 to +70°C (-40 to +160°F)

Clear Labels

PL

A see-through label with a food grade adhesive

Clear Labels are ideal for sealing bags and sacks. Clear Labels are ideal for sealing sampling holes. The label is transparent so that printing underneath the label can still be easily read.

- 95mm x 95mm size
- Adhesive conforms to FDA CFR175.105

NIR analysis of the product can be carried out through the label

Transparent label seal the hole and allows the printing to be seen
